

# Home*Life*Style

WINDOWS, DOORS & MORE

# Home*Life*Style

We strongly believe that home is a feeling, life is an integral part of your home, and style is a must.

Your windows and doors enhance your feeling of home by bringing light, energy and comfort into your everyday home. And while home updates aren't always a choice, they always present a moment to let your imagination blossom and create something that feels completely you. VEKA designs, engineers and extrudes high quality systems using its own unique mix of PVCu. Skilled fabricators and installers add their stamp of quality and craftsmanship, to bring products to create the perfect HomeLifeStyle.

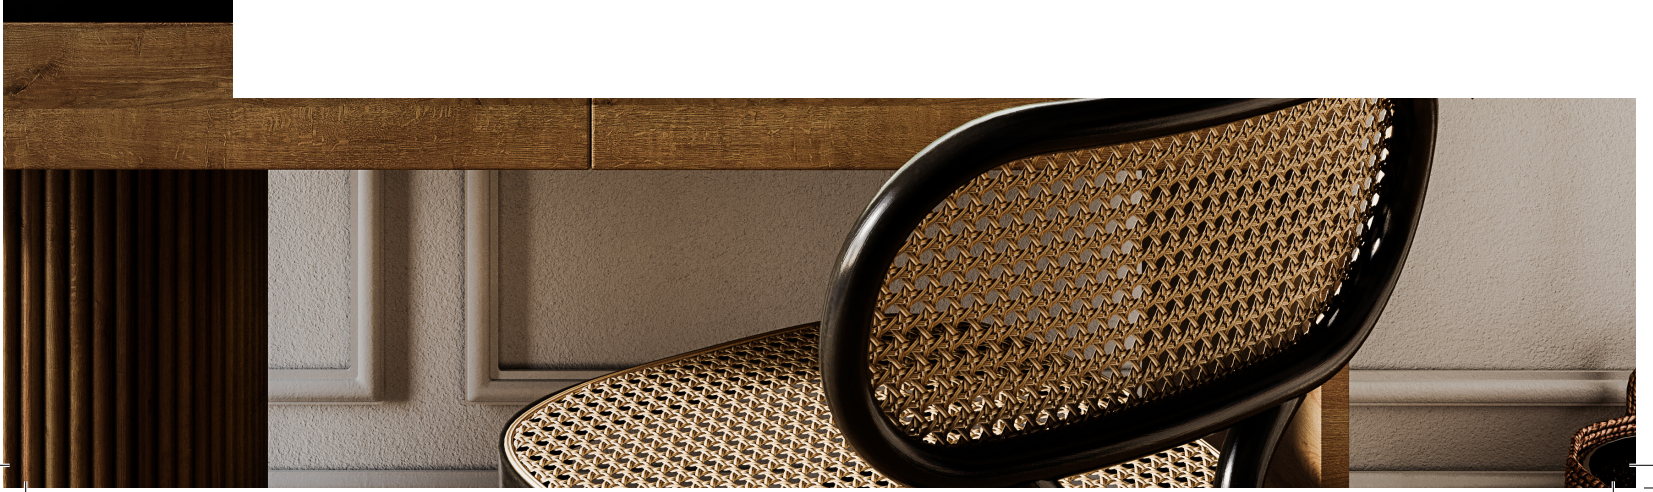

# Windows

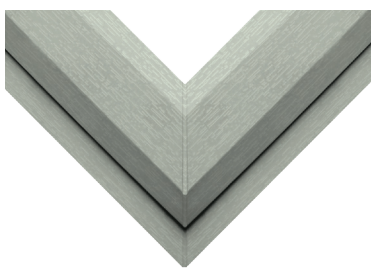

— An architectural flourish to energise your home.

Casement windows are versatile and popular, with hundreds of configurations to create the perfect window to suit your home. They can feature single or multiple sashes, with openings on one or both sides, the top, or full frame for ventilation options. This style combines functionality with an architectural flair, making it a striking addition to any home.

# Your Style, Your Way

## Bevelled

Angular lines give bevelled windows a clean, modern look.

## Sculptured

Softer, rounder lines, lean towards a more traditional look.

# Flush Windows

Versatile style teamed with innovative performance.

Flush windows blend traditional timber aesthetics with modern uPVC efficiency, offering a seamless look that suits any home. Their clean lines provide secure insulation, soundproofing, and come in various colours and features, like heritage hardware and Georgian bars. Ideal for both period and contemporary homes, these windows combine authenticity with innovative performance, making it the most flexible window on the market.

## Sliding Sash Windows

Modern design with traditional architectural character.

Sliding sash windows combine classic heritage design with modern functionality. Perfect for both period and contemporary homes, this style exudes timeless elegance. Originating in 1669, sliding sash windows are now enhanced with modern technology, offering both traditional charm and high performance, making them a quintessential part of British architecture.

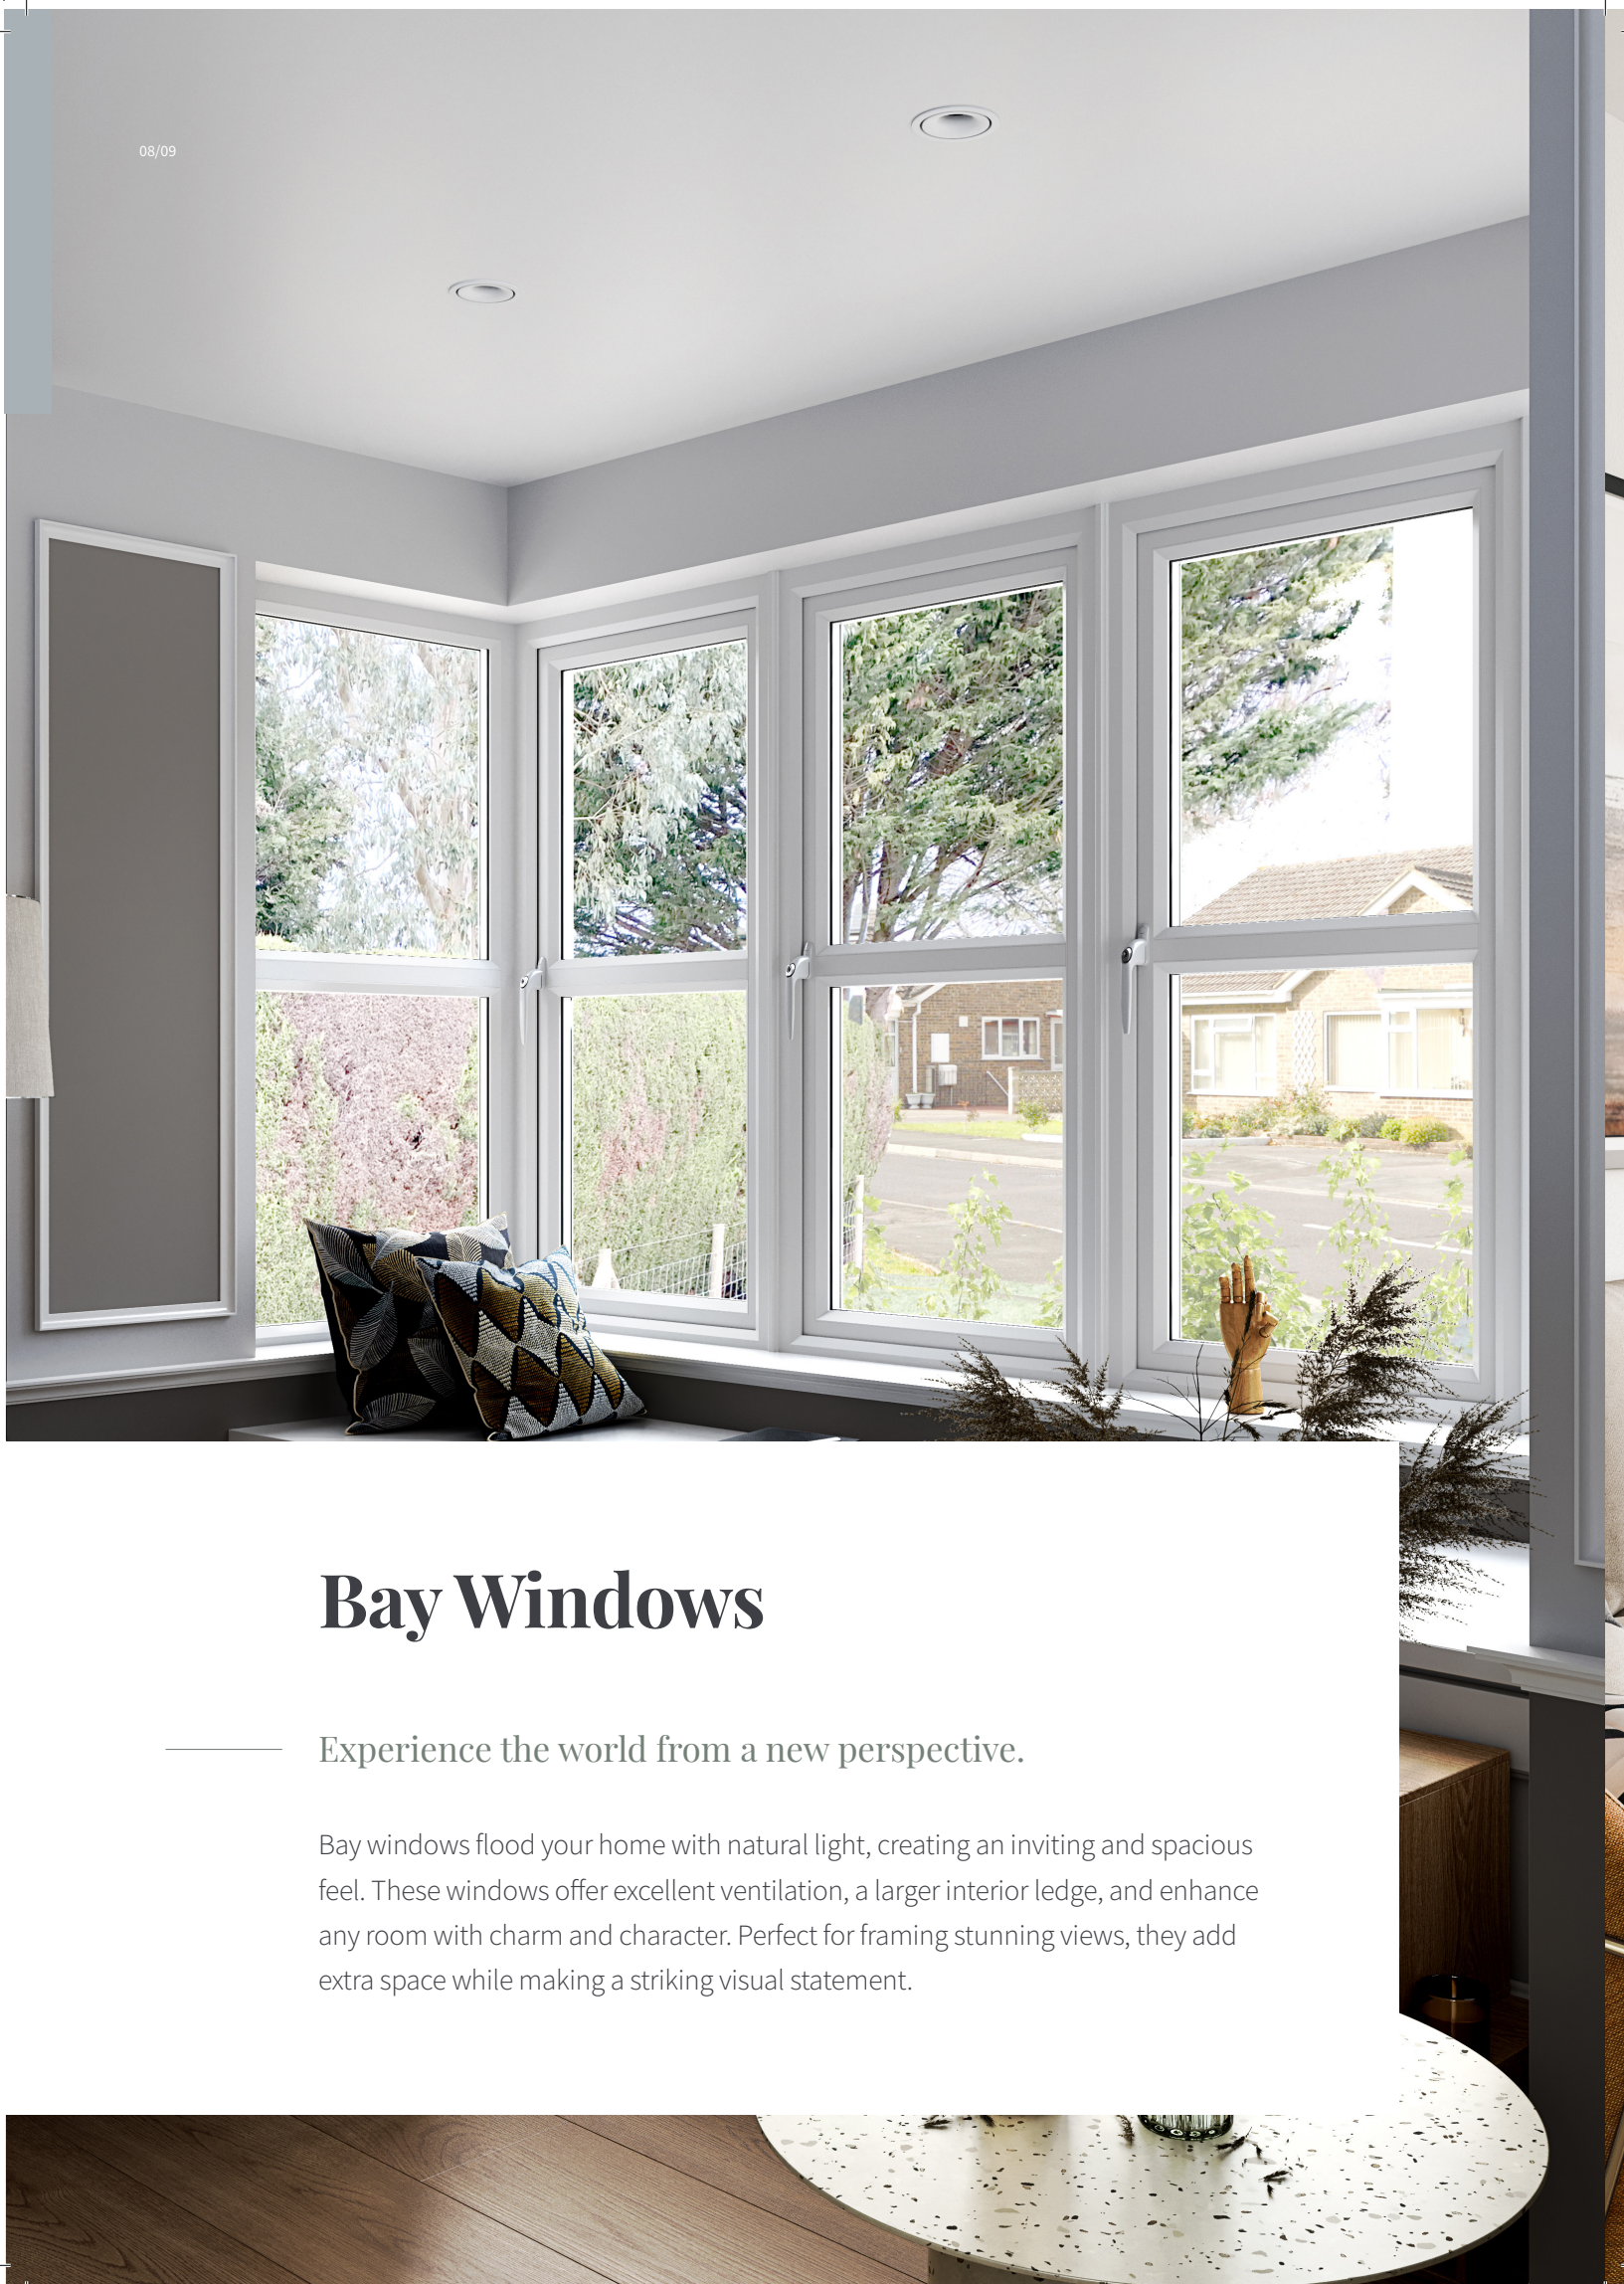

A photograph of a modern house with a light-colored wooden exterior and large, dark-framed windows. The windows are partially covered with blue pleated curtains. The house is situated in a scenic landscape with a lake, green hills, and a mountain in the background under a cloudy sky. The text is overlaid on a white rectangular background in the lower half of the image.

# Tilt & Turn Windows

Breathing versatility and security into your home.

Tilt and turn windows provide excellent security and flexibility, perfect for homes where access and safety are important. With four locking points and two ventilation modes, they combine functionality with style. Offering easy upkeep, they allow fresh air in while minimising noise, adding both versatility and comfort to your living space.

# Bay Windows

Experience the world from a new perspective.

Bay windows flood your home with natural light, creating an inviting and spacious feel. These windows offer excellent ventilation, a larger interior ledge, and enhance any room with charm and character. Perfect for framing stunning views, they add extra space while making a striking visual statement.

# Fully Reversible Windows

## 180 degrees of clarity

Fully reversible windows offer maximum visibility, easy cleaning, and style, making them ideal for apartments or multi-level homes. Their rotating design allows access to both sides of the window, while shielding from noise and maximizing sunlight and airflow.

# Entrance Doors

Step into outstanding style, security, and solace.

Entrance doors are fully customisable, energy-efficient, and secure. A new door can elevate your home's appearance, with a wide range of styles, colours, and glass designs to suit any taste. Beyond aesthetics, they provide enhanced security and peace of mind, turning your entrance into a sanctuary from the outside world.

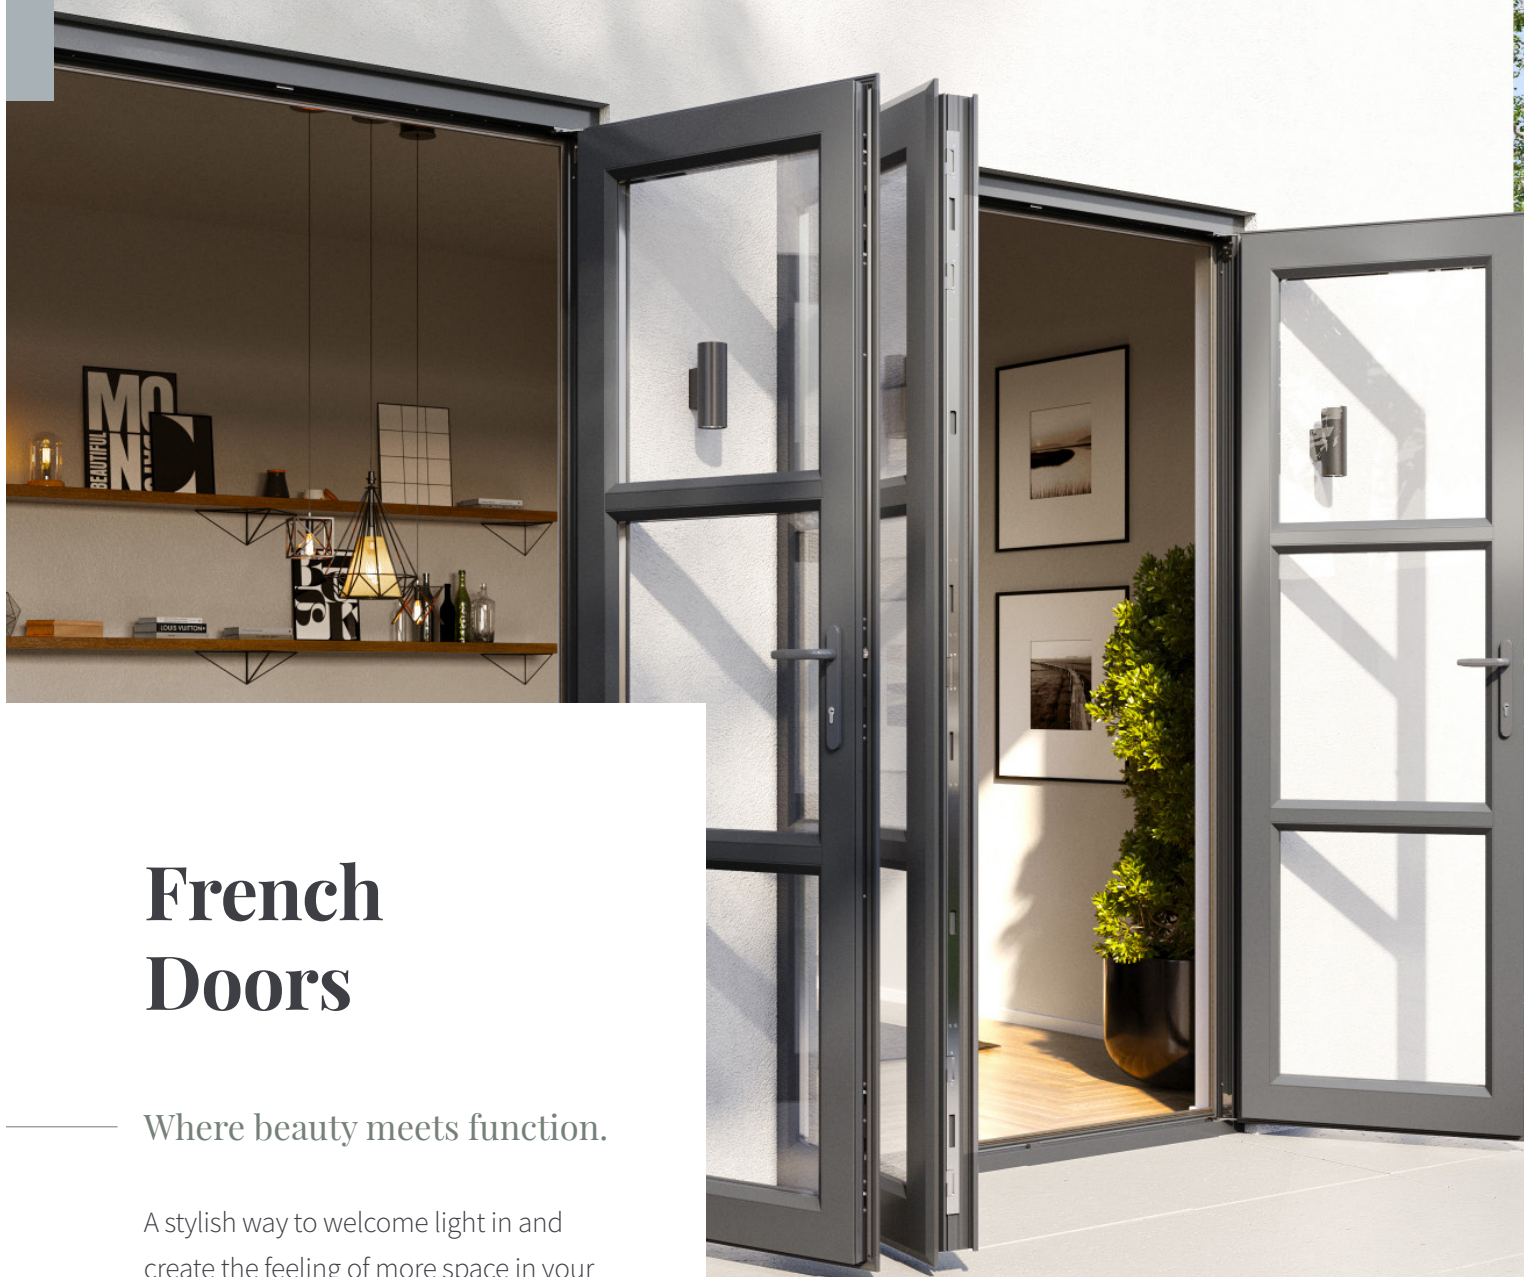

# Patio Doors

Invite the outside in.

Patio doors create a seamless connection between indoors and outdoors, flooding your home with natural light. Their slim frames offer a larger view of your outside space, while sliding smoothly for easy access. They're designed for insulation and convenience, enhancing both the atmosphere and the functionality of your living space.

# French Doors

Where beauty meets function.

A stylish way to welcome light in and create the feeling of more space in your home, French doors are an elegant threshold between your interior space and the great outdoors. They come in a range of colours and woodgrain finishes to exquisitely complement the style and type of home you inhabit. And with the possibility of combining your French doors with sidelights and windows, this choice is equal parts functional and beautiful.

# Bi-Fold Doors

---

Synergy between spaces.

Bi-Fold doors offer a stylish, functional way to merge indoor and outdoor spaces. The concertina design provides easy access, durability, and a sense of openness, allowing more light to flow into your home. These doors create harmony between your living areas and nature, enhancing the versatility of your space.

## Conservatories & Orangeries

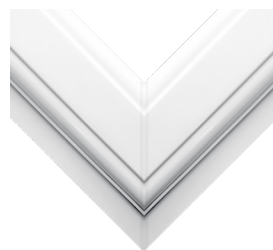

### A room with a view.

Live luxuriously in natural surroundings with the addition of a conservatory or an orangery. Enrich your home's ambience and value while expanding your living space and flooding your interior with daylight. And while they originated to cultivate tropical plants and fruits, they now serve to grow the potential of your home by opening a brand-new place to entertain and unwind.

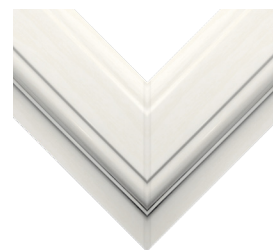

# 17 Irresistible Colours

Choose from 17 beautiful colours, including woodgrain and matt finishes, to personalise your windows and doors. From classic to contemporary, each shade enhances your home's style, inside and out. Whether bold, neutral, or earthy, these colour options allow you to express your personality while complementing your home's design.

## Finishing Touches

Individual taste, styles and preferences will influence not only the windows and doors you choose, but the finishing touches too. It's about creating a statement, enhancing kerb appeal, and bringing your personality to life through your home.

Whether you are looking for a contemporary feel or prefer a more traditional approach, there is a range of hardware for you. All are crafted in a variety of high-quality colour options that perfectly complement across both windows and doors.

**i** Ask your installer for more information.

# Safe & Secure

For enhanced security and peace of mind, all VEKA systems meet PAS24 and the Secured by Design (SBD) standard.

PAS 24 is a standard of testing to measure the security performance of windows and doors to ensure they can resist a level of attack from an opportunist burglar. Secured by Design (SBD) is an initiative that organises accreditation for products on behalf of the Police. To be awarded an SBD Standard, the product must meet requirements to prevent crime to a 'Police Preferred Specification'.

# Making Your Home More Energy Efficient

The windows and doors in your property are just one part of the puzzle when it comes to achieving an energy efficient home.

The energy performance of a window or door is influenced by a wide range of factors, so it's not easy to gauge by just looking at how it's made. Fortunately, there's a rating scheme to help you find the best one.

The energy efficiency of each window or door is categorised using an energy-rating scale from A++ to E. The complete product (frame and glass) is assessed to allow for heat loss, draughts and solar gain, giving a rating that indicates the overall impact of installing the product in your home.

## U-Values

You may see a U-Value quoted on a product's energy label or promotional materials. This is a measure of how easily heat passes through the product and contributes to how efficient the product is. But this is not the complete measure of efficiency, and you need to take the overall energy label rating when considering the product's energy saving potential.

## Sustainability

Not all plastic is bad. When it comes to windows and doors, uPVC is the most energy efficient amongst its peers. Plastic is an insulator unlike wood which is porous, whilst aluminium can cause thermal bridging and increased condensation. The window and door industry has made huge strides in the recycling and reuse of uPVC; it has given old frames a value, so they avoid simply being scrapped in the nearest skip.

A typical uPVC window frame lasts around 35 years, and it can then be recycled up to ten times, giving it a true lifespan of 350 years.\* After that, it can then be made into other things that don't require such high quality uPVC. Imagine what your window could be one day.

VEKA plc is committed to creating sustainable systems and in 2022 recycled content accounted for 28% off all total uPVC extruded.

\*According to the Building Research Establishment (BRE)

# British designed. World leading.

---

## British Engineering Back by German Quality

Headquartered in Germany and family owned since 1969, VEKA has been leading the global development of uPVC window systems for over 50 years. VEKA UK is in the historic mill town Burnley, Lancashire, where it designs, engineers and extrudes high quality systems, using its own unique mix of uPVC.

VEKA is just one part of a window's journey to your home. Skilled fabricators and installers add their stamp of quality and craftsmanship, to bring products that create the perfect HomeLifeStyle.
